

News Release

The Princeton Community Health Table (PCHT) of the
Support Our Healthcare Society

Aug 3, 2021

(Traditional territory of the Nlaka'pamux and Sylix people – Princeton,
BC)

The Support Our Health Care Society of Princeton is pleased to announce that we have been successful in obtaining a grant from Weyerhaeuser Company (www.weyerhaeuser.com) to support the work of the Princeton Community Health Table in implementing a “Mental Health First Aid” (MHFA) training program through the Mental Health Commission of Canada (www.mhfa.ca). This will enable 15 people to be trained in MHFA for the benefit of the Princeton community. The MHFA course is necessary training for volunteers who will assist in Mental Health (MH) and Substance Use (SU) community programming for Princeton and area.

The Support Our Health Care Society is a healthcare advocacy organization dedicated to the improvement of healthcare services for people living in Princeton and the surrounding area. The Princeton Community Health Table is an initiative within the SOHC Society that specifically aims to improve access to MH and SU services. It facilitates strong and sustainable relationships between the community, research institutions, elected government officials, healthcare providers, and multiple local organizations.
